TARIFF FORMAT

A. Page Numbering - Page numbers appear in the upper-left corner of the page. Pages are numbered sequentially. From time to time, new pages may be added to the tariff. When a new page is added between existing pages, a decimal is added to the preceding page number. For example, a new page added between pages 2 and 3 would be numbered 2.1.

B. Page Revision Numbers – If a new or revised page is filed cancelling a page, the new page will read “1st Revised Page xx” and also appear in the upper-left corner of the page. Each new or revised page will also have a correction number assigned to it beginning with Correction No. 1 and continuing numerically as new or revised pages are entered in this tariff. The correction number will appear in the bottom left-hand corner of the page. These numbers are used to determine the most current page version on file with the Authority.

C. Check Sheets - When a tariff filing is made with the Authority, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the Tariff cross referenced to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an (*). The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current page on file with the Authority.
